

Junior Web Dev, IT Operations Associate, Junior Network Engineer

EDMAR MALTO LINDO

Sampaguita Street, Santo Nino, Concepcion • Tarlac City, 2316 • emlindo08@gmail.com • 0955-9947-216

A Computer Science graduate with a unique mix of software development skills and practical IT infrastructure experience. I have worked on building and deploying full-stack applications from initial planning and development to real-world implementation, testing, and maintenance. Beyond software, I also have practical experience troubleshooting computer systems, handling network cabling, and supporting hardware and technical setups. I enjoy solving problems, adapting to new challenges, and working in fast-paced environments. With a combination of technical knowledge and practical experience, I am committed to delivering reliable and effective technology solutions.

Education

Concepcion Holy Cross College

Bachelor of Science in Computer Science

Thesis: A Digital Grading System with Instructor Application Module for Concepcion Holy Cross College, Inc.

Awards: Best Research Paper, Programmer

Concepcion, Tarlac

April 30, 2026

Benigno S. Aquino National High School

Senior High School Strand: Humanities and Social Sciences

Junior High School Course: Carpentry

Concepcion, Tarlac

March 2021

Experience

St. Paul College of Arts and Sciences

Intern/OJT

Concepcion, Tarlac

January 2026 – March 2026

- Assembled, repaired and maintained computer hardware, installed windows operating system (15 new units and 20 old models) to optimize academic performance.
- Configured and deployed robust network infrastructure, routed physical LAN cables and established secure wireless Wi-Fi access points to deliver reliable internet connectivity for the facility.
- Installed and calibrated 10 CCTV surveillance cameras and successfully diagnosed and repaired 5 existing units, executing extensive cable management and troubleshooting to enhance campus security.
- Developed digital inventory management system to effectively track computer laboratory hardware stocks, improving resource allocation and asset monitoring.
